Aliens Visit Earth

One day last autumn I was walking a road in the country. It was five o'clock in the afternoon and dark., I saw strange lights in the I was very I ran towards a forest to but unfortunately a strange craft landed in front me. Three pink and hairy beings from outer space got of the ship. They said, "Hello. Can you tell us how to get to, please?" I was so scared I ran away without their question. They started shouting and the last thing I heard was, "Come, you idiot! We are to save your planet."
